About Us

We are a long established, family run bathroom company. Our sister company Kiel Bathrooms has been installing bathrooms and disability adaptations for over 35 years. From the first moment you contact us with your query you will realise that we are not just trying to sell a walk-in bath, we are trying to meet your personal bathing needs.

We do not employ high pressure sales men and keep everything low key, we let you have the time you need to make informed decisions about the correct purchase for you and your family.

We have qualified plumbers on hand to take calls who are also able to answer the most difficult of questions regarding our range of walk-in baths.

Once the bath is delivered and your plumber is in your home installing the bath, our team will be on hand to answer any installation queries. All of our walk-in baths are delivered fully assembled and ready for installation, most plumbers find them very simple to install.

Delivery

All models of walk-in bath are supplied to your door with completely free delivery. The average delivery time on our walk-in baths is 2-3 weeks, if you need your chosen bath to be delivered quicker, we can usually help - just give us a call to request a faster delivery.

Thermostatic Taps

We strongly suggest you use thermostatic taps when using our walk-in baths. The user will need to be sat in the bath during filling, thermostatic taps regulate water temperature ensuring water safe for bathing and is not too hot to cause discomfort or injury.

Spa System

You could also upgrade your bath to include a luxury, very high quality, warmed air spa system. With jets situated around your legs and back for your relaxation and comfort, the system can be easily controlled at a touch of a button. The spa system comes pre-installed to the bath when it arrives with you, it is then easily fitted by your plumber and is trouble free to use. If you are unsure about using the spa system please consult a doctor before placing an order.

VAT Exemption

Supplies to handicapped people

We can only zero rate supplies to handicapped people when:

- the person is chronically sick or disabled
- the goods and services are purchased or acquired for their personal or domestic use

What does chronically sick or disabled mean?

A person is chronically sick or disabled if he/she is a person:

- with a physical or mental impairment which has a long-term and substantial adverse effect upon his/her ability to carry out everyday activities;
- with a condition which the medical profession treats as a chronic sickness, such as diabetes;

OR

- who is terminally ill.
- It does not include a frail elderly person who is otherwise able-bodied or any person who is only temporarily disabled or incapacitated, such as with a broken limb. If a parent, spouse or guardian acts on behalf of a chronically sick or disabled person, your supply is treated as being made to that chronically sick or disabled person.

Terminology

The term disabled is used throughout this notice and means handicapped or disabled or chronically sick.

Supplies to charities

We cannot zero rate all of the goods and services to all charities. We will then, therefore, take extra care in checking that a charity is eligible for VAT relief before zero-rating your supply.

Supplies of goods to charities will qualify for VAT relief where the goods are made available by the charity to a disabled person for their personal or domestic use.

There are certain other circumstances when supplies will qualify for VAT relief
